Petition Calling for Upgrading Edgecliff Interchange

To the Honourable Speaker and Members of the Legislative Assembly in New South Wales. This petition of the people of New South Wales brings to the attention of the House:

Access to public transport facilities is necessary to allow all passengers to use and change modes. This is a key step to encourage more passengers to use public transport rather than private vehicles, and to improve safety.

Current facilities at Edgecliff Interchange do not help bus passengers link to other transport, and reduce the usefulness of the Interchange. Full disability access will benefit all users, including parents with prams and shoppers carrying heavy loads, and improve safety.

The undersigned petitioners therefore ask the NSW Government to upgrade the Edgecliff Interchange to provide full access.
