Petition Calling for Tunnel Filtration

To the Honourable Speaker and Members of the Legislative Assembly in New South Wales. This petition of the people of New South Wales brings to the attention of the House:

Filtering road tunnels provides an opportunity to improve air quality across all of Sydney. Road tunnel exhaust stacks release concentrated car fumes and toxic air pollution, which damages health.

It is much easier and cheaper to install filters in tunnels rather than stacks, and before rather than after, tunnels are built.

Please protect the health of Sydney communities with filtration of the Cross City, M4 East, M5 East and Lane Cove Tunnels.

The undersigned petitioners therefore ask the NSW Government to ensure that all Sydney tunnels are filtered.
